

New Patient Consent feature

- Practice Admin will set this up with EHR Help Desk.
- Double Click the Blue i or Red i to open the Patient Profile Dialog box.

- New feature to add Consent and can link to a document in Patient Profile Dialog box.
- Includes Consent Types: Authorization to Share info with Family/Friends; Authorization to Share Information for Research; Informed Consent to Participate in Research; Patient Consent for Surgery; Patient Consent for Treatment; and Specialty Health Registry.
- EHR can create department specific consents.

- First---Scan the signed Consent paperwork into Allscripts Live Scan under the correct folder.
- Second---Locate the scanned document in the Chart in the EHR.
- Right click on the Scanned Document (it should have a little s).
- Choose Attach to Consent.
- It will be viewable on the Patient Profile Dialog under the Consent section (under the red or blue i). Highlight and click View Patient Consent Document.
