Facility / Location Impacted	All clinics currently live on Allscripts
Action Required	Please read the following information and attachments for new medication workflows.
Contact Information	Quillen ETSU Helpdesk (423) 282-6122, Opt 1 ehrhhelp@qetsu.org

Additional Information

Beginning July 1st, Tennessee law regarding the prescribing of controlled substances will go into effect. Please see the email attachments for visual descriptions from the TMA and State of Tennessee. In order to be compliant with the new law, a few workflow changes in Allscripts will be necessary.

1. When prescribing any medication, an ICD-10 code will now be *required*. This is the same workflow currently in place for all other order types, such as labs and radiology.
2. When prescribing a 30-Day Opioid, up to 1200 MME, for Medical Necessity, you should type the words "Medical Necessity" in the Pharmacy Instructions field of the script.

The screenshot shows a medication order form in Allscripts EHR. Key elements include:

- Co-Pay and Coverage Detail:** Patient status is Active. Demographics: Wt: 54.43 Kg, 26 Jun 2018; Ht: 144.78 cm, 26 Jun 2018; BSA: 1.45.
- SIG:** Personal (selected), New Structured, New Free Text. Includes a Dosage Calculator and fields for Maximum and Total Daily Dose.
- Instructions:** ALL: TAKE 1 TABLET Every 6 hours PRN, Qty: 1 X Tablet; QSH: TAKE 1 TABLET Every 6 hours PRN, Qty: 1 X Tablet.
- Ordering:** Days: 30, Qty: 30, Tablet, Refill: 0, Evaluate, 28Jun2018, DAW, Save as default for selected SIG.
- Additional Details:** Pharmacy Instructions field is highlighted in yellow and contains "Medical Necessity". Buttons for "Cite Result" and "Add NADEA" are visible.
- Ordered By:** Garland, Bridget.

3. When prescribing an opioid to patients who are exempt*, you should type the word "Exempt" in the Pharmacy Instruction field of the script.

 Print Rx:

Additional Details
 Pharmacy Instructions: **Exempt**
 (204 chars)
 Ordered By: Garland, Bridget

DUR Alerts: ! Drug-Drug (1) | PAR (0) | Disease (0) | Dup Therapy (0) | Dose (0) Pediatric Dose Range Checking is not available.

*Exempt patients include patients in palliative or hospice care or in a licensed healthcare facility; patients with a sickle cell diagnosis; patients seeing a pain management specialist or supervisee of specialist; patients who have been treated with an opioid for 90+ days in the last year; patients being treated for methadone, buprenorphine or naltrexone for MAT; or patients who have suffered severe burns or major physical trauma.

- When prescribing an opioid for a surgery patient, 20-day, up to 850 MME, best practice is to type the word "surgery" in the Pharmacy Instruction field of the script.

Substitution Allowed: _____ Dispense to Written: _____ **Dr: Pain, score 8/10**

Writes: 06-28-2018 Refills Authorized: **0** Times Rx: 120073553 C-II

- As a reminder, most users who would be checking the CSMD have a link to the CSMD Log In page in the Vertical Toolbar on the left-hand side of your Allscripts screen. If you do not see this link and need to check the CSMD as a provider or on behalf of a provider, please contact us so we can modify your profile.

The screenshot shows the Allscripts EHR interface for a patient named BRIDGET TEST. The vertical toolbar on the left side of the screen has the 'CSMD Log In' link highlighted in yellow. Other visible elements include the 'Provider' dropdown, 'Hide VTB' button, and various navigation tabs like 'Chart', 'Daily', 'Clinical Desktop', 'New Note', 'Worklist', and 'Task List'. The main content area displays patient information and a list of chart items.

- Also as a reminder, you can quickly document that you checked the CSMD by navigating to the ACI>Instruct>search for CSMD. Order the CSMD Check, which will appear in your note and under past orders in the Orders tab.
