

DM1 and DM2 (Touchworks doesn't distinguish well enough)

All E10 codes are Type 1 diabetes mellitus

E10 Type 1 diabetes mellitus

E10.1 Type 1 dm w/ketoacidosis

E10.2 Type 1 dm w/kidney complications

E10.3 Type 1 dm w/ophthalmic complications

E10.4 Type 1 dm w/neurological complications

E10.5 Type 1 dm w/circulatory complications

E10.6 Type 1 dm w/other specified complications

All E11 codes are Type 2 diabetes mellitus

E11 Type 2 diabetes mellitus

E11.0 Type 2 dm w/hypermolarlarity

E11.1 Type 2 dm w/ketoacidosis

E11.2 Type 2 dm w/kidney complications

E11.3 Type 2 dm w/ophthalmic complications

E11.4 Type 2 dm w/neurological complications

E11.5 Type 2 dm w/circulatory complications

E11.6 Type 2 dm w/other specified complications

All E13 codes are OTHER SPECIFIED

diabetes mellitus (not Type 1 or Type 2)

This includes: secondary dm, dm due to genetic defects of beta-cell function, dm due to genetic defects in insulin action, post-pancreatectomy dm, postprocedural dm

O24.4 gestational diabetes to be used on the mother's chart

Diabetes Coding Hints

- DM codes are combination codes that include
 - type of diabetes mellitus
 - the body system affected
 - the complications affecting that body system.
- Be specific include info about which eye, skin ulcers, oral complications and gangrene.
- Use as many codes within a particular category as necessary to describe **all** of the complications of the disease.
- Code(s) from category Z79 are needed to identify the long-term (current) use of insulin, oral hypoglycemic drugs, or injectable non-insulin antidiabetic.
- If the patient is treated with both oral hypoglycemic drugs and insulin, both code Z79.4, Long term (current) use of insulin, and code Z79.84, Long term (current) use of oral hypoglycemic drug
- If the patient is treated with both insulin and an injectable non-insulin antidiabetic drug, assign codes Z79.4, Long term (current) use of insulin, and Z79.85, Long-term (current) use of injectable non-insulin antidiabetic drugs.
- If the patient is treated with both oral hypoglycemic drugs and an injectable non-insulin antidiabetic drug, assign codes Z79.84, Long term (current) use of oral hypoglycemic drugs, and Z79.85, Long-term (current) use of injectable non-insulin antidiabetic drugs.
- Code Z79.4 should not be assigned if insulin is given temporarily to bring a type 2 patient's blood sugar under control during an encounter.

We are working with Allscripts to correct the ICD10 names in Touchworks.
