| E Schedule | 1y 3y 5y All Default Filtering: Last 1 year 45 of 162 Chart Items (0 Invalid and 79 Audit Items) |
| 🗹 Tasks | Motes Office Notes |

To help us provide you with reports where inactive patients can be filtered out, please use the following key words to indicate a change in the patient's status:

- Transfer / transferred
- Dismiss / dismissed

For patients in hospice or long-term care, please use the appropriate ICD-10 code:

- Z51.5 End of Life Care
- Z59.3 Lives in Assisted Living Facility

You can also add a chart alert for hospice or long-term care (using abbreviation LTC); however, use of the ICD-10 for these two situations is the preferred method of documentation.

Please note: if more banner room is needed, you may delete "risk score" items at this time.

If a patient sees another provider within ETSU Health, please include the following to the chart alert:

- the date
- the clinic
- the new provider
