

How to Create a Medication Link Task

1. Right click on the medication that the patient is calling about
2. Choose New Task

The screenshot displays a medical software interface with a medication list on the left and a context menu on the right. The medication list includes the following entries:

- amLODIPine Besylate Therapy: 27Jun2018 ACTIVE Ordered
- Amphetamine-Dextroamphetamine Therapy: 04Jun2018 DIRECTED;
- Betamethasone Valerate Therapy: 04Jun2018 A DAY;
- Colace 100 MG Oral Therapy: 11Oct2017
- Delsym Cgh/Cld Nig Therapy: (Recorded)
- EPINEPHrine 0.15 M Therapy: (Recorded)
- HYDROcodone-Ace Therapy: 28Jun2018 NEEDED FOR PAIN
- Lisinopril 20 MG Ora Therapy: 28Jun2018
- Lorcet Plus 7.5-325 Therapy: 28Jun2018

The context menu on the right contains the following options:

- Send Rx To Pharmacy
- ePA Form Available
- Enter in Error
- Verify and Add
- Remove
- Review
- Add to favorites
- Cite selected
- Cite all
- Advanced Result Citation
- Generate Next Order
- Reconcile
- Reconcile Hx
- New Task** (highlighted with a red arrow)
- Print Medication List
- Print Requisition
- Show Potential Duplicates
- Reprint Rx/Resend Rx
- Drug Ed
- Interaction Checking

3. Send to the nurse (User) or Team (Clinical staff team) by clicking on Assign To: button
4. Choose Task: Medication Renewal-Link
5. Right in the comment section the pertinent information such as “Patient called in requesting refill on this medication.”
 - a) *This could be created as a macro.*
6. Click OK.
