

## How To document Using the Opioid Risk Tool

From <https://www.drugabuse.gov/sites/default/files/files/OpioidRiskTool.pdf>

*The Opioid Risk Tool (ORT) is a brief, self-report screening tool designed for use with adult patients in primary care settings to assess risk for opioid abuse among individuals prescribed opioids for treatment of chronic pain. Patients categorized as high-risk are at increased likelihood of future abusive drug-related behavior. The ORT can be administered and scored in less than 1 minute and has been validated in both male and female patients, but not in non-pain populations.*

*This tool should be administered to patients upon an initial visit prior to beginning opioid therapy for pain management. A score of 3 or lower indicates low risk for future opioid abuse, a score of 4 to 7 indicates moderate risk for opioid abuse, and a score of 8 or higher indicates a high risk for opioid abuse.*

Mark each box that applies	Female	Male
<b>Family history of substance abuse</b>		
Alcohol	1	3
Illegal drugs	2	3
Rx drugs	4	4
<b>Personal history of substance abuse</b>		
Alcohol	3	3
Illegal drugs	4	4
Rx drugs	5	5
<b>Age between 16—45 years</b>	1	1
<b>History of preadolescent sexual abuse</b>	3	0
<b>Psychological disease</b>		
ADD, OCD, bipolar, schizophrenia	2	2
Depression	1	1
<b>Scoring totals</b>		

Questionnaire developed by Lynn R. Webster, MD to assess risk of opioid addiction.  
 Webster LR, Webster R. Predicting aberrant behaviors in Opioid-treated patients: preliminary validation.

## How to Enter Opioid Risk Tool into Allscripts.

1. Go to Flowsheets tab.
  - a) Change your Specialty first. Then choose the Opioid Risk from the middle dropdown.

5. Click *Ok*. Then *Commit*.

a) Tip: If you can't find the *New Column* or *Enter Result* selection in the bottom menu, click the double arrows on the right and select *New Column* or *Enter Result* in the menu. This should also add it to your bottom menu.

6. The Opioid Risk form can be located in some notes to add in documentation.
  - a) It includes an All Normal button for scores less than 3.

The screenshot shows a software interface for an Opioid Risk Screen. At the top, there is a header with 'Note' and 'Health Management/Reminders'. Below this, a navigation bar includes 'New Patient', a search icon, 'ALLSCRIPTS, Provider', a magnifying glass icon, and 'Status: Needs Input'. On the right side of the header are icons for a folder, a checkmark, and a menu. Below the header is a toolbar with icons for document, text, image, and settings. The main content area is titled 'Opioid Risk Screen' and features an 'All Normal' button in the top right corner. The form contains several sections: 'ORT' with a radio button and a help link; two radio button options for 'ORT administered and results reviewed with patient' and 'ORT was NOT administered.'; a 'Scoring' section with three radio button options for risk levels (less than 3, between 4 and 7, and 8 or higher); and an 'Additional Comments' section with a large text input area. A left-hand sidebar lists various medical notes and assessments, with 'Opioid Risk Assessment' and 'Opioid Risk Screen' highlighted.
