

Med Order Protocol

(Allowing Residents/Nurses to print Scheduled Rx before authorization by provider)

When the Medication Details screen comes up, click the drop down arrow in the Prospective box and choose "Per Protocol." Fill out the remainder of the form as usual, click OK. Once you commit the changes, the print dialog box will ask you to choose your printer. An Order Notification task will be sent to the preceptor.

The screenshot shows the 'Medication Details' window for patient STACY, 8 YO, F, DOB: 03Mar2003. The medication is Lortab 10-500 MG Oral Tablet, linked to [1] Osteoarthritis (OA). The 'Co-Pay and Coverage Detail' section shows the status as 'Active' and the SIG as 'Personal'. The dosage instructions are: TAKE 1 TABLET EVERY 4 TO 6 HOURS AS NEEDED FOR PAIN. Days: 7, Qty: 40. The 'Additional Details' section shows the 'Auth' dropdown set to 'Prospective', with a red arrow pointing to the 'Per Protocol' option. The 'Medication History' section is empty.
