Patient Education
Finding It, Sharing It, and Making It “Meaningful”
Patient Education Requirements

- Differing Quality and Population Health programs that we participate with require that patient-specific education resources are provided to patients.
Documenting Patient Education: What Counts?

- Printing Drug Education from the medication list
- Document a Vaccine Information Sheet was given
- Using the InfoButton
- Documenting Patient Education from Order Sets.
- Patient Education that is selected from the Instruction tab will only count if it has been selected from an Order Set/Group (folder).
Printing Drug Education

- Drug Education can be printed for any medication on the patient’s medication list.
- Right click on the medication, scroll down, and choose **Drug Ed**.
Printing Drug Education

- The **Patient Medication: Handout** dialog box will open. Click **Print**. From the Print Dialog box, either choose the printer you wish to print to or Preview the document and print to your default printer.
Documenting Vaccine Information Sheets

- When a vaccine is administered, document that a Vaccine Information Sheet (VIS) was provided.

- From within the **Immunization Details** screen, answer **Yes** to the question “Vaccine Information Statement provided with this administration?”

- Complete the immunization documentation as usual.
Documenting Vaccine Information Sheets

To Be Done: 10-Jun-2015  Status: Active

Dose:  
Manufacturer:  
Lot:  
Route:  
Site:  
NDC:  
Exp:  

Consent Obtained with this Administration: 
Previously Obtained: 

Vaccine Information Statement (VIS)

Vaccine Information Statement provided with this administration?  Yes  No

Vaccine Information Statement Publication date: 08-Jun-2015

Date of last Vaccine Information Statement provided:

Duration: 0 minutes  
Person Taught: Care Giver

Method: Written Materials  
Evaluation: Accepted the material
Documenting Patient Education using the InfoButton

- Whenever a problem or medication is selected, use the blue InfoButton to access Healthwise Patient Education material.
- With a problem or medication in view and highlighted, click on the blue InfoButton (you can also right click to access the InfoButton.)
- The Healthwise Information viewer will pop up and allow you to select the education you would like to print or send to the patient.
Documenting Patient Education using the InfoButton

Check the box next to the materials you would like to print, and then click the Print icon. The Print Dialog box will appear. Select Print.
Documenting Patient Education using the InfoButton

Click the Print Preview to see the entire contents of the information.

Learning About Dental Care With Braces

Introduction

Braces are sets of wires and brackets attached to the teeth. They straighten crooked teeth and improve the way the upper and lower teeth line up.

Good daily dental care is always important, but with braces it's even more important. Plaque is a thin film of bacteria that sticks to teeth above and below the gum line. It can build up and harden into tartar. The bacteria in plaque and tartar can cause tooth decay and gum disease. Your braces' wires and brackets easily trap bits of food. Besides damage to your teeth, not cleaning well can lead to stains on your teeth after the braces come off.
Documenting Patient Education using the InfoButton

- If the patient is signed up for the patient portal, the education can be sent to the portal.
- To send education to the portal, click on the portal icon, complete the **Send to Portal** dialog box, click **OK**, and **Commit**.
Documenting Patient Education from Order Sets

- Patient education that is selected from the Instruct tab will only count if it has been selected from an Order Set/Group (folder). Click on the **Order Set folder** (not the check box next to it) to view the orders that are available.
- Check the box next to the education that you would like to document. Click **Ok** and **Commit**.
Creating your own Order Set

- Search for an Instruction that you would like to include in an Order Set (folder)
- Right click on the instruction and select Add to Favorites
Creating your own Order Set

- Select a folder that has already been set up to add the instruction to, or
- Create a **New Order Group**
Creating your own Order Set

- Create a name for the Order Group and then click **Create**.
- Click **Add**.
- Make sure to add the folder to your Quicklist if you want to see it there.
Viewing and Printing Instructions for Patients

- Instructions that you order for the patient from the Instruct tab will appear in part on the Clinical Summary (the first line).
- To share the education in its entirety, make sure to print the page for the patient.
- Right click on the item to view the instructions.
Viewing and Printing Instructions for Patients

- To print, click on the **Encounter Summary/Alert icon** in the patient banner or in the Clinical Toolbar.
- Check **Ad Hoc Patient Instructions**.
- Click **Print Pt. Ed.**
Viewing and Printing Instructions for Patients

- The Print Dialog screen will pop up. Print the instructions either to a network printer or Preview and print locally.
