

Personalize Settings for Immunizations

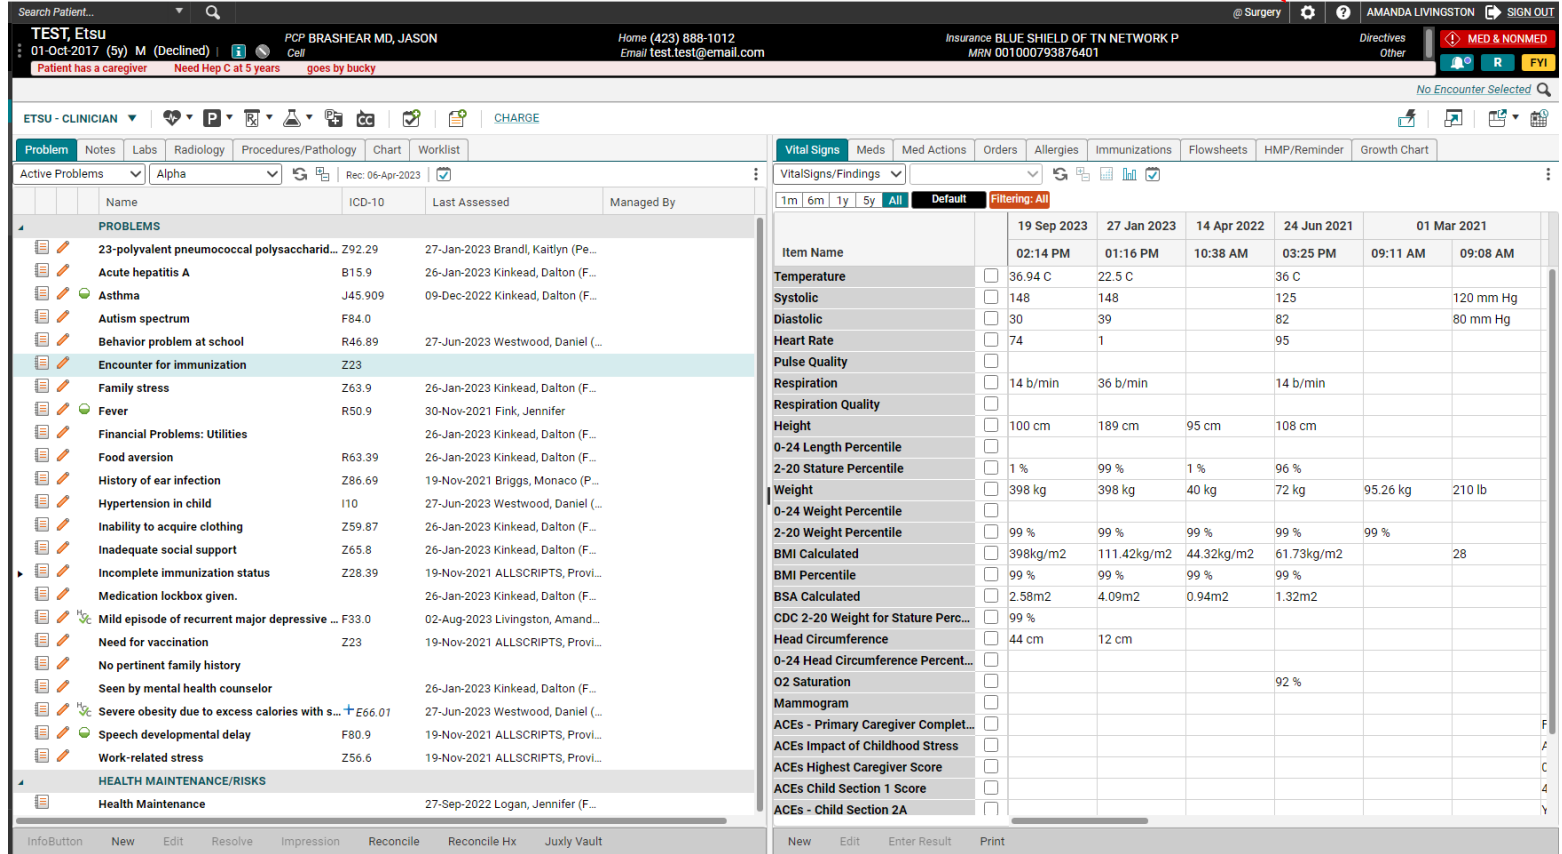

It is possible to personalize your settings in Touchworks to remember the most commonly used Lot# and NDC#.

Lot #: The system will remember the last 5 previously used Lot #'s, stored by site, for the selected immunization.

NDC#: NDC's are dependent on the manufacturer. Once the manufacture preference is set to YES, and after the user types in the NDC number one time, the med admin details will remember it and the user will not have to keep typing it.

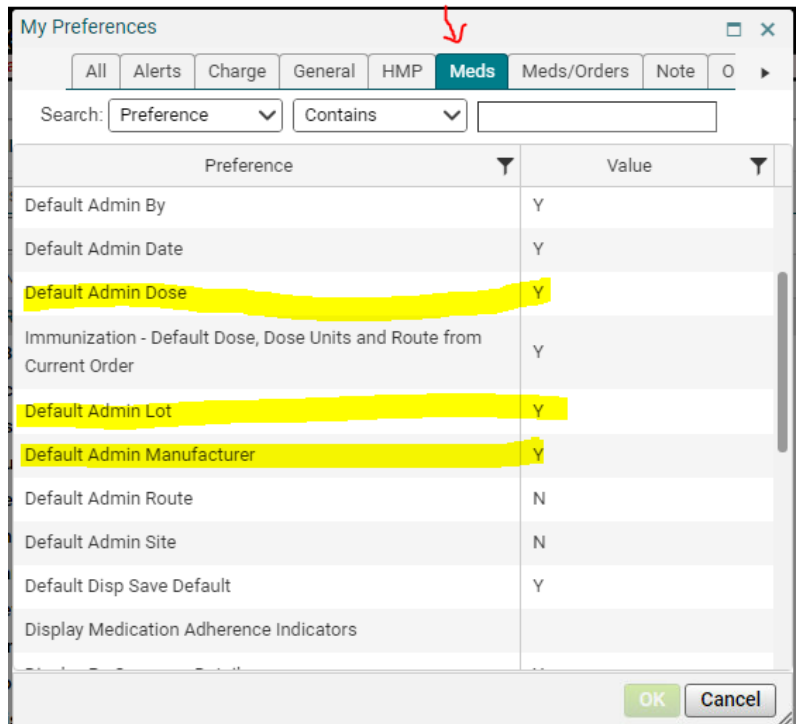

❖ To personalize your settings:

- Open a fake patient
- On the upper right section you will see a gearbox 
- Click it and choose My Preferences.

The screenshot shows the Touchworks EHR interface for a patient named TEST, Etsu. The top navigation bar includes the user's name (AMANDA LIVINGSTON), a 'SIGN OUT' button, and a 'MED & NONMED' indicator. The main content area is divided into several tabs: 'Vital Signs/Findings', 'Meds', 'Med Actions', 'Orders', 'Allergies', 'Immunizations', 'Flowsheets', 'HMP/Reminder', and 'Growth Chart'. The 'Immunizations' tab is currently selected, displaying a table of immunization records with columns for dates and times. On the left side, there is a list of 'PROBLEMS' including '23-polyvalent pneumococcal polysaccharid...', 'Acute hepatitis A', 'Asthma', 'Autism spectrum', 'Behavior problem at school', 'Encounter for immunization', 'Family stress', 'Fever', 'Financial Problems: Utilities', 'Food aversion', 'History of ear infection', 'Hypertension in child', 'Inability to acquire clothing', 'Inadequate social support', 'Incomplete immunization status', 'Medication lockbox given.', 'Mild episode of recurrent major depressive ...', 'Need for vaccination', 'No pertinent family history', 'Seen by mental health counselor', 'Severe obesity due to excess calories with s...', 'Speech developmental delay', and 'Work-related stress'. At the bottom, there are buttons for 'InfoButton', 'New', 'Edit', 'Resolve', 'Impression', 'Reconcile', 'Reconcile Hx', and 'Juxty Vault'.

- Under the Meds tab, change your Default Admin Dose, Default Admin Lot, Default Admin Manufacturer, and Vaccine Information Statement provided with this administration to Y.
- Then Click Ok.

The 'My Preferences' dialog box is shown with the 'Meds' tab selected. The 'Meds' tab is highlighted with a red arrow. The 'Search' field contains 'Preference' and 'Contains'. The table below lists various preferences and their values:

Preference	Value
Default Admin By	Y
Default Admin Date	Y
Default Admin Dose	Y
Immunization - Default Dose, Dose Units and Route from Current Order	Y
Default Admin Lot	Y
Default Admin Manufacturer	Y
Default Admin Route	N
Default Admin Site	N
Default Disp Save Default	Y
Display Medication Adherence Indicators	

At the bottom of the dialog box, there are 'OK' and 'Cancel' buttons.
