

## Population Health Data Request Workflow

We have implemented a new workflow for requesting data from our Population Health Data Team. For future data requests, please email [meacdatateam@etsu.edu](mailto:meacdatateam@etsu.edu) for assistance. Once your email has been received, a member of the team will then reply with a data request application to collect additional information regarding the details of the request. A preview of the request form is attached.

### Research Data Requests

If the information requested from the Population Health Data Team is for Research, Grant, or Publication purposes, IRB approval or exemption may be required. To determine whether your study requires IRB review and/or approval prior to data distribution, please visit the link listed below.

For other questions regarding the ETSU Institutional Review Board, please contact their office at 423-439-6053 or email [IRB@etsu.edu](mailto:IRB@etsu.edu).

### Data Elements

Our department has the capability to extract structured data elements from Allscripts TouchWorks to meet the specific needs of your request. Structured data elements include Appointments, Diagnoses, Vitals, Medications, Orders, Allergies, Flowsheet items, Resulted items, Labs, etc. If you have questions regarding extractable data elements within Allscripts or the feasibility of a report, please contact us at [meacdatateam@etsu.edu](mailto:meacdatateam@etsu.edu)
