

Plan All-Cause Readmissions

Measure Details: Percentage of members 18 years and older discharged from an acute hospital stay who were readmitted (acute, unplanned) to any hospital within 30 days, either for the same condition or for a different condition.

Exclusions:

- Readmission date is same date as discharge date
- Patient died during hospital stay
- Female members with principle diagnosis of pregnancy
- Principle diagnosis of a condition originating in the perinatal period
- Non-acute inpatient stays
- Principle diagnosis of maintenance chemotherapy
- Principle diagnosis of rehabilitation
- Organ transplant
- Potentially planned procedure without a principle acute diagnosis

Current Scores

(Scores are pulled from claims data, which has a 2-3 month lag)

Payer	Eligible	Gaps	Percentage	Star Score
Humana	46	2	4.3%	5
Bluecare	12	0	0%	5
Blue Advantage	32	0	0%	5

We are currently looking great in this measure; however, this is one that tends to get worse as the year progresses, so please be aware and keep up the good work!
