

UPL New Workflow

BIRTH CONTROL DOCUMENTATION

For the Upper Payment Limit, we need to begin tracking patients who receive birth control following their pregnancy. Please be sure to document, as structured data, what type of birth control the patient is on at their postpartum visit.

Contraceptive Care: Postpartum Women — Percentage of Women ages 15-44 who had a live birth and were provided a long-acting reversible method of contraception (LARC) within 60 days of delivery.

Exclusions: Non-live births, births after October 31st of the measurement year

HOW TO DOCUMENT

Bilateral tubal ligation/Hysterectomy— Enter in the Past Surgical History. Edit to add the date that the surgery was performed. Can be placed in Description field or Onset Date field.

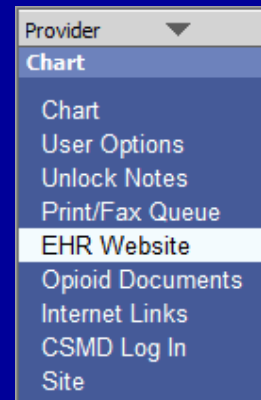

Long-Acting Reversible Contraceptive—Add to the Medication tab, and Record w/o Ordering.

Condoms—Supplies tab. Search for “Condom.” Will appear in the Orders tab on the desktop.

Oral Contraceptives—E-prescribe as usual. This will send to pharmacy and add to Med list.

Partner Vasectomy/Abstinence— Under social history, code Z78.9.

Other—other options available under Social History
