

Removing Unwanted Labs from Your Note

Open the Results/Data section in your note and right click anywhere in the white section. Choose Advanced Result Citation.

The screenshot displays the 'Note Authoring' window for a patient named Allison, 35 years old, female, born 10/3/1976. The interface is divided into several sections:

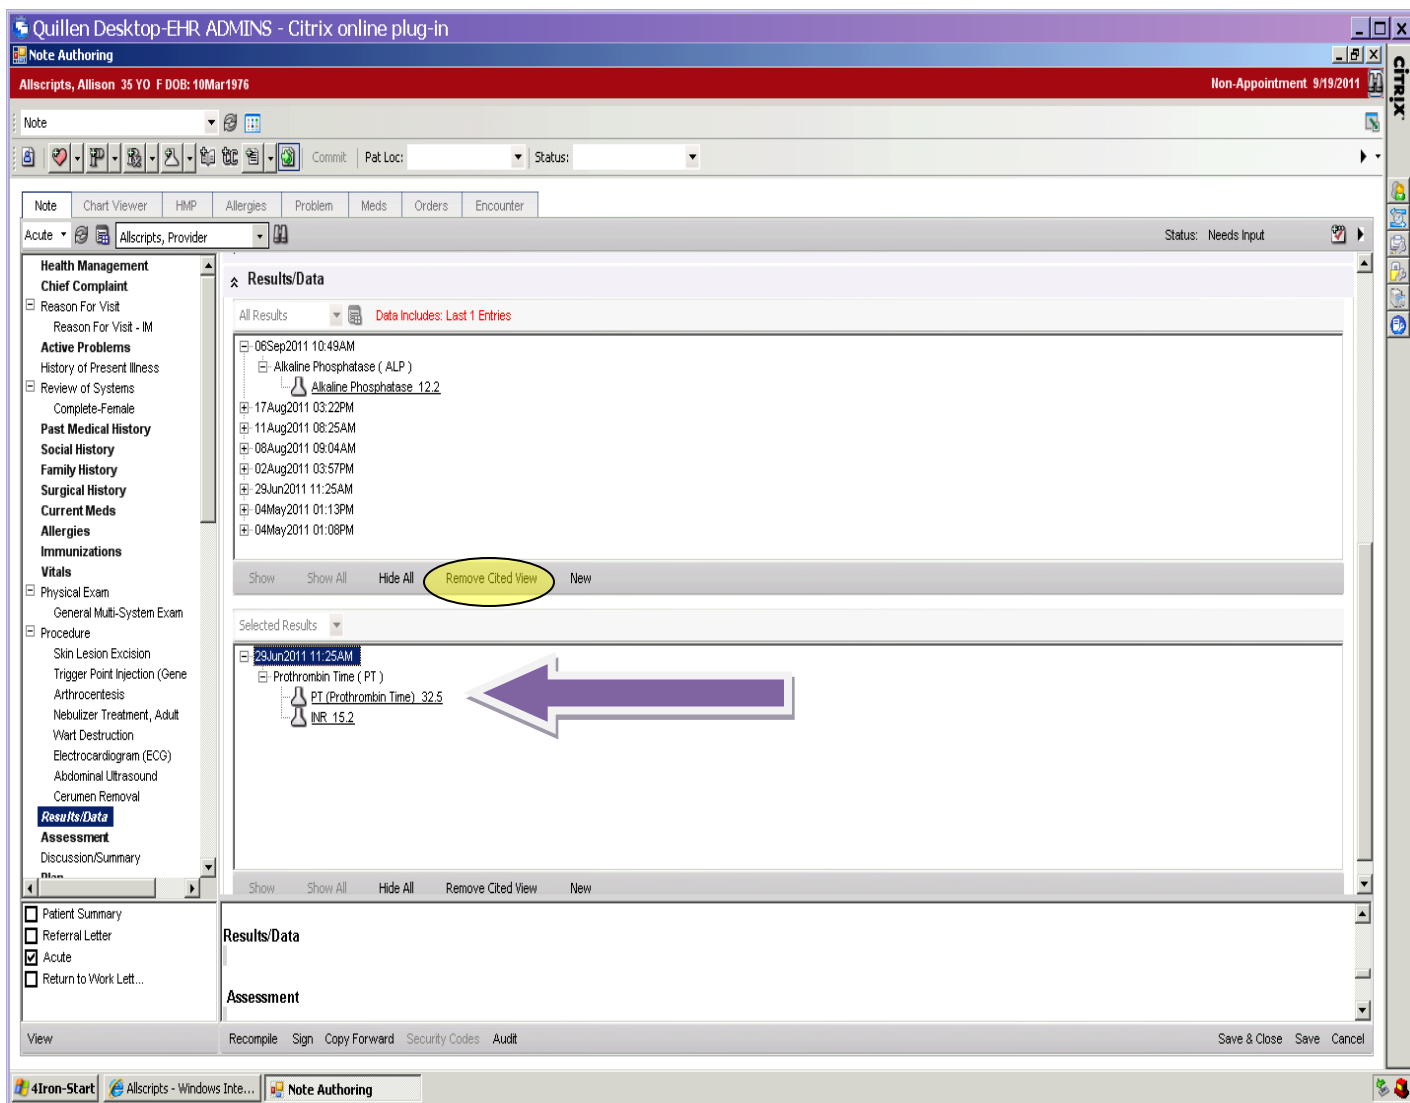

- Header:** Shows patient information and appointment details (Non-Appointment 9/19/2011).
- Navigation:** Includes tabs for Note, Chart Viewer, HMP, Allergies, Problem, Meds, Orders, and Encounter.
- Left Panel:** A tree view of medical history categories such as Health Management, Chief Complaint, Active Problems, Past Medical History, Social History, Family History, Surgical History, Current Meds, Allergies, Immunizations, and Vitals.
- Main Content Area:** The 'Results/Data' section is active, showing a list of lab results for 'Alkaline Phosphatase (ALP)'. The most recent result is from 06Sep2011 10:49AM. A context menu is open over the results, with 'Advanced Result Citation' selected.
- Bottom Panel:** Contains checkboxes for 'Patient Summary', 'Referral Letter', 'Acute', and 'Return to Work Lett...'. Below this are buttons for 'View', 'Recompile', 'Sign', 'Copy Forward', 'Security Codes', and 'Audit'. On the far right, there are 'Save & Close', 'Save', and 'Cancel' buttons.

In the Results Citation Selection box, choose that labs that you want to pull into the note.

Click OK.

The result (or results, if you chose multiple labs), will appear in a new section below the Results/Data section.

Click on the *Remove Cited View* in the *Results/Data* section to remove the unwanted labs. The labs you chose will pull into the *Results/Data* section and appear in your note output. Please note that once you click "remove cited view," **these labs cannot be recalled**. The only way to get them back would be to cancel out of the note without saving it, and open a new note. So please be careful when choosing the labs to pull in and removing the remaining labs.

Acute Owner: Allscripts, Provider Status: Needs Input
