Y	Rx Renew Request	N [REDACTED], E [REDACTED]	Wood,Timothy
Y	Rx Renew Request	M [REDACTED]	Youssef,Dima
	Rx Renew Request	S [REDACTED] J	Bhattad,Pradnya

Click Go To... in the bottom left (If you Undelegate the task, it just goes to the provider to Approve or Deny.)

Allscripts actually requires a reply back to the pharmacy-meaning the task has be addressed even if the actual work (Rx filled) has already been done.

You can do that by using the buttons in the bottom left.

To resolve the task you must use the Approve or Deny in the bottom Left.

If you choose Approve it is a refill and will go to the pharmacy after the provider Authorizes.

If denied, pick a reason for why it is denied.

Drug: [dropdown]

- Medication never prescribed for patient
- Patient has picked up Prescription
- Patient needs appointment
- Patient never under provider care
- Patient no longer under provider care
- Patient should contact provider
- Patient unknown to provider
