

Entering DXA Scan/Bone Density as Structured Data

1. Pull patient up by clicking on the **dropdown** in the patient banner and clicking **Search**

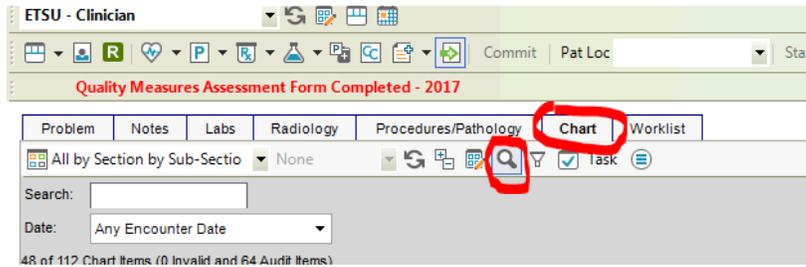

2. Type Last Name, First and hit enter. Match the DOB and double click on the patient.

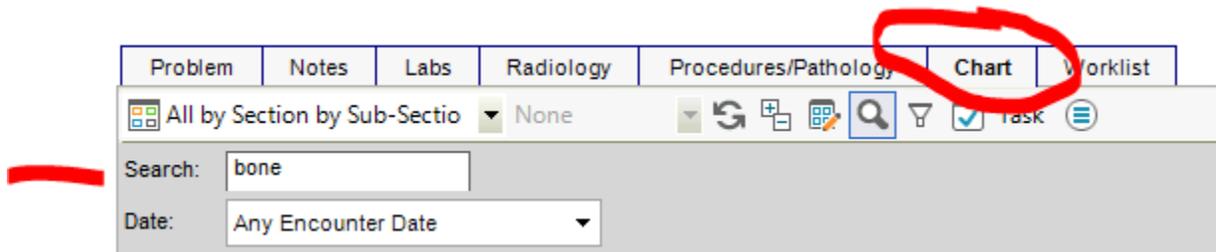

3. Go to the **Clinical Desktop**

4. Go to the **Chart** tab and click the **Search** icon.

5. In the **Search** box search for the **dx** or **bone density** report.

6. You will find at least 1 document.

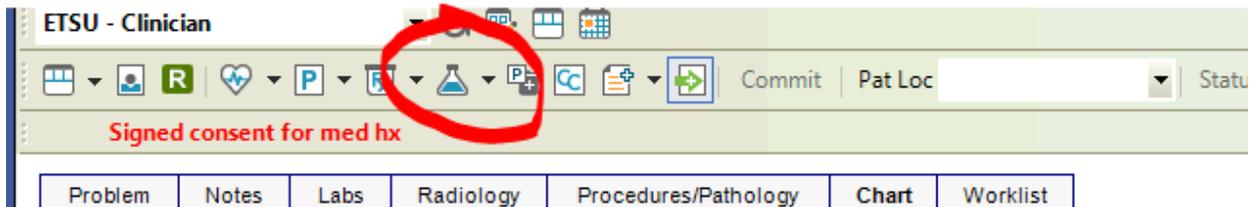

- a. If you see  icon beside dx, it means it has already been entered as structured data and you can move on.

 DXA Scan - Done: 28-Jul-2016 - Myers, Adam; Enc: 25-Apr-2018 -

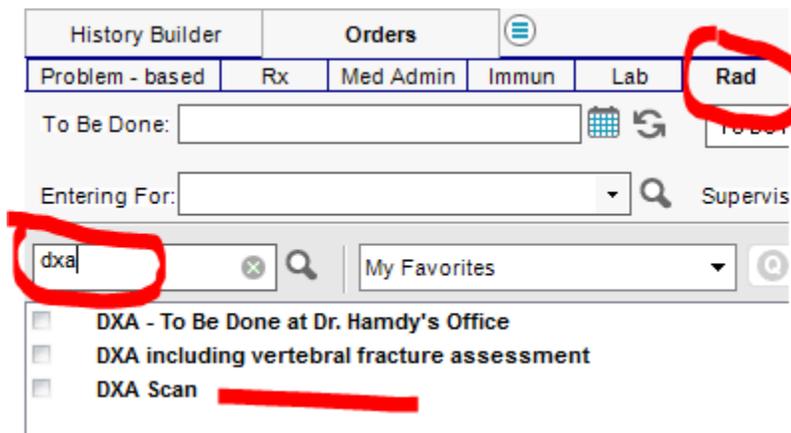

- b. If you ONLY see  DXA Scan Note, you will need to enter the dx/bone density as structured data. To do so, follow the below instructions:

7. **Double click** on the document. This will open the document. You will need to double check the document to make sure it is truly a colonoscopy. *Make note of the date and the PCP because you will need this date when you create the structured data.

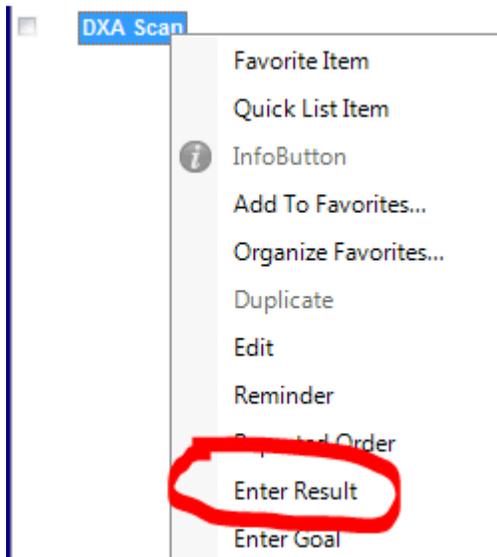

8. Once you determine that the document is in fact a dxa scan, close the document and Click on the **beaker**.

9. Go to the **Rad** tab and search for **dxa**

10. **Right click** on the **DXA Scan** order and choose **enter result**.

11. Change the **To be Done** and the **collected/examined** date to the date of the colonoscopy. Change the **Performing Location** to **Other**. Put the PCP in the **Ordered by**, and **Performed by** field.
