

# Let's get to the **heart** of the matter.

Tennessee ranks third in the nation for heart attacks and strokes.

## **We're here to help change that.**

We're the Tennessee Heart Health Network, and we're launching a three-year state-wide initiative to support primary care practices and expand state-level capacity to improve heart health in our state. Join us!

## **What's in it for you, your practice, and your patients?**

### **Core Benefits of Participation**

- Strengthen and expand your primary care team
- Improve heart health outcomes for your patients
- Increase reimbursement for population health visit codes and better patient outcomes
- Gain an experienced practice facilitator to work closely with your practice
- Receive \$6,500 compensation per participating practice for key staff time
- Get training and certification for staff in motivational interviewing, health coaching, and patient navigation

**TENNESSEE  
HEART HEALTH  
NETWORK**

TNHeartHealth.org

- Participate in virtual learning collaboratives designed to share best practices proven to move the needle on blood pressure control, medication adherence, and smoking cessation
- Get access to heart health best practice tools, implementation guides, webinars, and other resources
- Receive quarterly practice improvement reports on key heart health metrics
- Obtain advanced QI training for you and your staff in state-of-the-art QI techniques, including AGILE and LEAN

**Take Action | Contact**

info@TNHeartHealth.org

## Practice-Selected Interventions

Practices receive assistance with one or more of the following:

- **Health Coaching**—Training your staff to provide health coaching, diabetes education, and/or care transitions support to generate increased revenue while improving care
- **Motivational Text Messaging**—Implementing a turn-key heart health reminder system to provide motivation and education to your high-risk patients
- **Physician-Pharmacist Collaboration**—Delivering telemedicine outreach to improve medication adherence and blood pressure control

## Practice Responsibilities

- Participate in training, certification, and learning collaborative activities
- Complete study surveys to assess practice capacity for improvement
- Submit data to the Tennessee Population Health Data Network (TN-POPnet)
- Implement one to three practice-selected interventions provided by the Tennessee Heart Health Network
